(1) Ratio (expressed as a percentage) of the principal amount of the loan to the appraised value of the real property serving as collateral for the loan.

(2) Represents the highest interest rate payable on the longest maturing bonds issued by the borrowing church in the financing.

(3) Represents the average interest payable by the borrowing church assuming the loan remains outstanding through its full term.

(4) Multiple of principal amount of bond loan times the borrower's total support and revenues in the most recently completed fiscal year prior to the bond underwriting.

(1) Ratio (expressed as a percentage) of the principal amount of the loan to the appraised value of the real property serving as collateral for the loan.

(2) Represents the highest interest rate payable on the longest maturing bonds issued by the borrowing church in the financing.

(3) Represents the average interest payable by the borrowing church assuming the loan remains outstanding through its full term.

(4) Multiple of principal amount of bond loan times the borrower's total support and revenues in the most recently completed fiscal year prior to the bond underwriting.

-
- (1) Ratio (expressed as a percentage) of the principal amount of the loan to the appraised value of the real property serving as collateral for the loan.
- (2) Represents the highest interest rate payable on the longest maturing bonds issued by the borrowing church in the financing.
- (3) Represents the average interest payable by the borrowing church assuming the loan remains outstanding through its full term.
- (4) Multiple of principal amount of bond loan times the borrower's total support and revenues in the most recently completed fiscal year prior to the bond underwriting.
